

**artists of films leaving  
out some details in  
order to make there  
story understandable  
but still very  
informative for the  
public view as they tell  
the history of a topic  
through a perspective**

**critics bc of its  
"inaccuracies" even  
though history has  
always been  
manipulated bc of how  
it's told**
